What is your investment objective profile?

Income with Limited Growth
Moderate Growt

Income with Limited Growth

7-10

I am willing to accept limited risk to my investment principal in this account, even if that means this account does not generate significant returns and may not keep pace with inflation. This objective generally focuses on the generation of current income. Accounts with this objective may be invested primarily in fixed income/ bonds, with up to 25% in equities/ stocks, but actual investment allocations will differ based on individual client goals, concerns, and market conditions. This objective has historically been the most conservative on a relative basis and has exhibited lower volatility than objectives that allocate a greater portion of investments to the equity/stock markets; however, past performance is no guarantee of future results.

Income with Moderate Growth

11-14

I am willing to accept relatively low risk to my investment principal and will tolerate some volatility to seek a modest level of income and/or objective returns. This objective generally focuses on asset appreciation sufficient to offset inflation over time while also generating current income. This objective may consist of a majority of fixed income/bonds, with up to 45% in equities/stocks, but actual investment allocations will differ based on individual client goals, concerns, and market conditions. This objective has historically exhibited modest volatility compared with objectives that allocate a greater portion of investments to the equity/stock markets over time; however, past performance is no guarantee of future results.

Growth and Income

15-18

I am willing to accept moderate risk and volatility to my investment principal to seek higher returns. This objective generally targets a balanced asset allocation approach that seeks to provide growth potential and generation of interest or dividend income. This objective may consist of up to 65% in equities/stocks, with the remainder in fixed income/bonds, but actual investment allocations will differ based on individual client goals, concerns, and market conditions. This objective has historically exhibited less overall volatility than objectives that allocate a greater portion of investments to the equity/stock markets over time; however, past performance is no guarantee of future results.

Primarily Growth

19-23

I am willing to accept a relatively higher risk to my investment principal, including greater volatility, to seek higher returns over time. This objective generally targets growth of the portfolio, which may or may not focus on the generation of interest or dividend income. This objective may consist of up to 85% in equities/stocks, with the remainder in fixed income/bonds, but actual investment allocations will differ based on individual client goals, concerns, and market conditions. This objective has exhibited greater market value fluctuations than objectives that allocate a greater portion of investments to the fixed income markets; however, past performance is no guarantee of future results.

Growth 24–28

I am willing to accept significant risk to my initial principal in order to aggressively seek maximum returns. This objective generally seeks maximum growth potential or generation of income from equities or alternative investments. This long-term-oriented objective is typically invested almost entirely in equities/stocks, with the remainder, if any, in fixed income/bonds or alternative investments, but actual investment allocations will differ based on individual client goals, concerns, and market conditions. This objective has historically offered the highest level of risk and widest market value fluctuations compared to other objectives, especially in the short term; however, past performance is no guarantee of future results.
